

I-T Happens! How to Design, Budget & Use Your Office Technology

No matter what phase of dentistry you are currently in; the task of designing an IT friendly practice atmosphere can pose a challenge. Discover the difference between hardware and software regarding its potential to run your practice efficiently. From cables to wireless, Laci will plug you in on the bonus features with IT that make practicing dentistry fun. With an action plan for financing and budget goals you discover where you want to be and where you should be. You will leave this program with your own mini technology assessment to assist you in your journey of technology design.

Key Topics:

- ❖ Distinguish which hardware and software you must have
- ❖ What is an IT company and how you should choose one
- ❖ Have fun with the extra toys in technology
- ❖ Making realistic budgets
- ❖ Determine what is an appropriate time line
- ❖ Examine and Take home your own mini assessment
